

What is a Varta black dynamic battery?

This car battery is from the Varta brand. Varta Black Dynamic batteries are suitable for smaller and older vehicles and enable repairs to be made in line with the current market value. The battery's cold cranking current is 720 A. The dimensions of the product are 353 x 175 x 190 mm.

What is the el700 battery capacity?

The larger your motor, the more cranking current you need. The EL700 has a capacity of 70 Ah. The higher the value, the more electrical charge can be stored in the battery. The battery's EFB technology makes a particularly large number of engine starts possible and is suitable for vehicles that require a lot of energy.

What is the battery capacity of Exide el700?

The EL700 is manufactured by Exide. The battery is 278mm long, 175mm wide and 190mm high. The cold cranking current is 720 A. The larger your motor, the more cranking current you need. The EL700 has a capacity of 70 Ah. The higher the value, the more electrical charge can be stored in the battery.

What is a Yuasa YBX conventional battery?

Yuasa YBX Conventional batteries feature specialist internal components, unique design features and cutting edge technologies to combat the causes of battery failure and deliver reliability, long life and superior performance.

Here's the battery weight of a new 720 WH battery. And also the 504 WH on the Heckler.... 720 WH 8# 11.2 oz or 3.94 kg and 504 wh is 6# 12.8 oz or 3.08 kg.....so it adds 0.86 kg or 1.89# Last edited: Feb 23, 2022.
