

How much does a solar system cost in 2025?

A fully-installed and MCS-certified solar panel system with 4kWh of solar power costs around £6,000-£7,000 in 2025. That's without a battery--add a home battery to your system and your cost will increase by roughly £2,500 for a 5kWh battery, bringing the total cost to around £9,000 or so.

How much do solar panels cost?

With that pricing, the panels for a typical 4kW system would cost just £350 (that would be a manufacturer's price--usually one in China). Here is a chart from his presentation: The NimbleFins team estimates that the current cost of a solar panel system is around £1,800 per kW of power.

How much do solar panels cost for a 4 bedroom house?

We estimate that solar panels for a four bedroom house could cost from around £6,600, assuming ~3,000 kWh of electricity consumption per year. A battery would add a few thousand pounds. What's the cost of solar panels for a three bedroom house?

How much electricity does a solar system produce a year?

A system this size could produce around 3,000 kWh of electricity a year, which can suit a typical household, as median electricity consumption in the UK is 2,900 kWh per year.

How can I save money on solar panels?

There are a few ways to save money on solar panels--or even qualify for free solar panels. Smart Export Guarantee (SEG): The Smart Export Guarantee (SEG) enables homes or businesses with renewable energy (primarily solar PV panels) to earn money for exporting excess renewable electricity back to the grid. Rates are frequently in the 3-4p/kWh range.
