

Application is required to install solar photovoltaic panels

Do I need a prior approval for a solar panel installation?

Application to determine if prior approval is required for a proposed: These provide more scope for solar panel installations on buildings (or in the curtilage of a building) and in non-domestic off-street parking areas without needing full or householder planning permission. When will you need to make a prior approval application?

Do I need planning permission to install solar panels?

The need for planning permission depends on various factors such as the property type and location. While some installations may be exempt, others require planning permission. It is best to consult with the local planning authority or a qualified installer to determine the specific requirements for your property. Can I install solar panels myself?

Do I need permission to install a solar PV system?

Not all solar panel projects need to apply to installation; however, if your solar PV system exceeds 3.68kWp of capacity, you'll need permission from the relevant DNO. While this may sound daunting, don't worry as we've created this handy guide that contains everything you need to know about DNO applications.

Do I need a planning application for a solar panel system?

You must notify the Distribution Network Operator (DNO) of any installation. The size of the system determines the notification process. If a solar panel system is going to be greater than 50kW, prior approval will be required from the Local Planning Authority. This is a much less prescriptive process than a planning application.

Do I need planning permission for a solar PV project?

The rules apply to both solar thermal panels and solar PV. However, permitted development rights do not always apply as there are a few exemptions. If your project falls into one of these, you will require planning permission unless you can make any adjustments to your plans. Exceptions can include:
