Can I install a spare part for my solar lights?

We are unable to advise, comment or instruct installation of any spare part. Installation is entirely at t.. Keep your outdoor solar lights functioning properly with our selection of solar light replacement spare parts including solar panels, batteries, and LED lights.

How do I choose a solar light installation site?

Ensure your solar light installation site is free of obstructions from access to the sun. Also, you'll want to ensure there aren't foreign light sources that can interfere with the panel's light sensor. Keep the pole away from heat sources and ensure it's on level, solid ground (we can accommodate if the soil isn't the most sturdy).

What is a solar LED fixture?

A solar LED fixture is a component in a solar light system that houses a light. With solar LED lighting, fixtures come in arrays of several LED fixtures embedded into a full array. It is the part of the system that holds the light bulb. Check your manufacturer documentation to learn about the wiring of your fixture. LEDs have expanded the range of available fixtures.

Does a solar light come in a box?

All the components of a solar light come included in one box. This, however, doesn't mean that all the tools you'll need to properly install the light come with it. Here's what comes shipped in the box: Ensure your solar light installation site is free of obstructions from access to the sun.

How to choose a solar light system?

When choosing a solar light system, one of the most important processes is called sizing. One faulty part in an entire system can turn your solar light investment into decoration. For example, if one LED in a series fixture malfunctions, the entire light fixture becomes unusable.
