

## Automatically shut off the power after the battery is fully charged

What happens if a battery loses its charging capacity?

When the battery completes its charging cycles, it will die quicker and you have to charge it more frequently. The battery will keep losing more charging capacity as you use it. So, if the battery has lost all charging capacity the power bank will automatically turn off. Sometimes, the power bank won't even turn on.

Is having a battery fully charged and the laptop plugged in harmful?

So, having a battery fully charged and the laptop plugged in is not harmful because as soon as the charge level reaches 100%, the battery stops receiving charging energy and this energy is bypassed directly to the power supply system of the laptop. Hope it helps. XF\_AULTER,

Why does my power bank stop charging?

When the current (I) levels are too low the power bank "thinks" the device is fully charged so it automatically stops charging to avoid overcharging. That's why when you connect a device that doesn't need too much current (I), the power bank stops as it thinks the device is fully charged.

Why does my power bank turn off after 30 seconds?

(Here's The Solution) Sometimes when we try to charge a device, the power bank disconnects and turns off after 30 seconds. Why does this happen? The power bank can turn off automatically if the current draw is too low. That means you are charging a device that requires less than 60mAh to be charged.

What happens if I remove the battery?

If you remove the battery it will automatically shut down (in a sense) when you remove power. Type "Power Options" in Start Menu search text field and hit enter key. Click on "Change Plan Settings" in front of active plan (Balanced, High Performance or Power Saver). Click on "Change advanced power settings".

Why does my HP laptop shut off when I pull the power cord?

If you have it set to "always on" it will shut off when you pull the power cord, even if the battery is charged. This will also happen on many non-HP laptops, if you don't have a HP laptop or there is not a "Rixane" option available, select the "Portable/Laptop" power scheme. Hope this helps!
