

Why is Estonia building the largest Battery Park in Europe?

Estonia is building the largest battery park in continental Europe, boosting energy security and supporting the transition to renewables.

Where is the Baltic storage platform located?

Located in Kiisa, just outside Tallinn, the project is spearheaded by the Baltic Storage Platform - a joint venture between Estonian energy company Evecon, French solar producer Corsica Sole and sustainable finance management company Mirova.

Are battery parks balancing the energy supply in the Baltic countries?

As the Baltic countries prepare for grid synchronisation with the rest of Europe, energy security becomes a pressing issue. Battery parks like the one being built in Kiisa play a critical role in balancing the power supply, especially as Estonia shifts toward renewable energy sources such as wind and solar.

Why is energy storage important for Estonia?

Energy storage is also vital for meeting Estonia's goal of sourcing all its electricity from renewable sources by 2030. The country's climate minister, Yoko Alender, emphasised the role of storage systems in this transition, saying they would help ensure a "clean, reliable and affordable energy future" for Estonia.

What is a Battery Park in Tallinn?

The battery park, located in Kiisa, just outside the capital city of Tallinn, will consist of two battery storage installations with a combined output of 200 megawatts-hours (MWh) and a total storage capacity of 400 megawatt-hours (MWh). This is enough to supply electricity to approximately 90,000 homes.

Which countries are investing in large-scale battery storage?

Beyond Europe, countries like the United States and Australia are also investing heavily in large-scale battery storage. In California, the Moss Landing Energy Storage Facility, the largest in the world, has a capacity of 1,200 MWh.
