

What is a battery terminal cap?

Battery terminal cap is intended to protect battery terminal from water,dust,oil and other contaminants thereby lowering the danger of short circuit,minimizes terminal corrosion,and prevents electric shock. The battery terminal cap or boot cover is usually put on top of the battery terminal connector to protect the battery connection.

What are PVC Battery terminal caps?

PVC battery terminal caps prevent the battery terminals from being damaged when you accidentally drop something on the battery. If the battery terminals get damaged, then there is no way for the battery to be charged. Most people prefer clean looking cars than those covered in dirt.

Which insulator caps for battery terminals are available?

Developed by VTE these insulator caps for battery terminals are available as standard in red or black(other colours available for volume orders). Regulations call for all connection terminals to be insulated. After years of innovation and design VTE have an insulating boot for almost every application.

What is a red/black battery cover?

Colour-coded(red/black) covers in various sizes and configurations to protect battery terminal posts from shorting,corrosion and damage. A range of colour coded red/black covers in various sizes and configurations to protect 12V battery terminal posts from shorting,corrosion and damage.

This quality battery cap comes prebuilt with a 10A circuit breaker terminated to a 2-core flexible cable. All you have to do is terminate the bare end with your chosen connector (usually a 3 pin female XLR), push the ...
