

Why is the UK investing in battery manufacturing?

The UK government is committed to continuing to invest in UK battery manufacturing. This strategy builds on our impressive track record of targeted government support, leading to a pipeline of investments through the battery ecosystem:

Why is the UK battery strategy important?

That conclusion reinforces the importance of acting at pace now to develop a battery supply chain in the UK. (Paragraph 87) A) The UK Battery Strategy has set out the Government's activity to support our objectives and established the framework and priorities for our future work with industry, on both the batteries of today and of tomorrow.

What does the Advanced Manufacturing Plan & UK battery strategy mean for investors?

The Advanced Manufacturing Plan and UK Battery Strategy should set out further interventions that will provide investors with more long-term certainty that the UK's energy prices will be competitive with other markets. (Paragraph 74)

What is the government's battery strategy?

The Government plans to publish a clear battery strategy enabling a joined-up government-industry approach to delivering a battery ecosystem that unleashes economic prosperity, delivers on our net zero ambitions and ensures our access to technologies and applications that are vital to our security.

What should be included in the UK battery strategy?

1. In the forthcoming UK Battery Strategy, the Government should specify the extent to which future demand for batteries in the UK should be supplied by domestic sources in 2030 and 2040, along with a 10-year plan for scaling-up this capacity and an estimate of the public money required to do so.

What is the UK's first battery strategy?

The UK government has unveiled its first battery strategy. The roadmap should improve domestic electric vehicle supply chains and reduce reliance on Chinese industries for securing and processing critical raw materials, manufacturing batteries, and recycling batteries on scale.
