

What is the batteries regulation?

The Batteries Regulation is the first European legislation that considers the full life cycle of batteries, including sourcing, manufacturing, use, and recycling, all in a single law. This aligns with the European Green Deal's circularity goals and promotes the sustainability of batteries throughout their life cycle.

What types of batteries are covered by the batteries regulation?

The Batteries Regulation applies to all batteries, including portable batteries, and more specifically, portable batteries of general use.

What is the EU Battery regulation?

The EU Battery Regulation encompasses a comprehensive set of rules and requirements established by the European Union (EU). On July 28, 2023, the EU Commission published the new EU Battery Regulation (2023/1542) concerning batteries and waste batteries, which replaced the EU Batteries Directive (2006/66/EC) and took effect on August 17, 2023.

What are battery safety requirements?

These include performance and durability requirements for industrial batteries, electric vehicle (EV) batteries, and light means of transport (LMT) batteries; safety standards for stationary battery energy storage systems (SBESS); and information requirements on SOH and expected lifetime.

What is the new EU Regulation 1542 for batteries?

The EU Battery Regulation encompasses a comprehensive set of rules and requirements established by the European Union (EU).

What are the new labelling requirements for batteries?

Labelling requirements will apply from 2026 and the QR code from 2027. The regulation amends Directive 2008/98/EC on waste management (see summary) and Regulation (EU) 2019/1020 on market surveillance and compliance of products (see summary). It repeals Directive 2006/66/EC on the disposal of spent batteries (see summary) from 30 June 2027.
