

Where is the solar panel located on a patio awning?

Discreet solar panel located on top right of awning. Our eco friendly awning that saves energy, perfect for your home patio area. The RA Compact Solar Powered Full Cassette Awning is an eco-friendly patio cover solution. Featuring a retractable design with a powerful solar-powered motor, it also provides a top-tier awning arm mechanism.

How does an awning motor work?

A sealed tubular motor is built within the rollertube of the awning, which the fabric wraps around and a standard 3 core power cable exits the motor on the desired side out the rear of the cassette casing and is either fitted with a 3 pin plug and plugged into a standard domestic socket or wired into a fuse spur.

What is a solar powered full cassette awning?

The RA Compact Solar Powered Full Cassette Awning stands out for its eco-friendliness. It includes a solar-powered motor with electronic top and bottom adjustments and an intermediate position. The motor has a strength of 20 Nm, developed specifically for awnings, and requires no additional wiring.

How does an awning transmitter work?

When the transmitter sends a command to the awning; open or close, the motor turns in the relevant direction at a consistent speed (normally 17 revolutions per minute) ensuring a smooth operation.

What is Ra solar powered full cassette awning?

The RA Solar Powered Full Cassette Awning is your solar solution for a stylish, convenient, and sustainable outdoor living. Our solar solution for shutters and screens is sustainable and saves money. It is only necessary to charge the motor once, the rest of its lifetime it will be charged by the solar panel.
