

What is a battery label?

The largest standard format of the battery label series is suitable for displaying graphic content, which means that the intended use is not limited to price labelling. It can also be used as an information or door sign, for example.

What should be included in a battery label?

Labels must clearly indicate the chemical composition of the battery, including materials like lithium, cobalt, nickel, and manganese. This information is vital for handling, transportation, and recycling processes.

What are the new labels for lithium batteries?

The new labels for lithium batteries are DL1938, DL1950, DL1951, DL1952, and DL1953. They have replaced the DL1944 label. You must indicate the UN number you are shipping and provide your phone number on the labels. You can write it in by hand or get custom pre-printed labels with your contact details.

Do you sell battery labels?

Yes, we offer battery labels. They are all paper labels with permanent pressure-sensitive adhesive on the back. Battery labels are sold in rolls of 500 and in quantities of 1000 unless otherwise specified.

What are the international standards for battery labels?

Following international standards such as those from the International Organization for Standardization (ISO) and International Electrotechnical Commission (IEC) ensures that battery labels meet global requirements, facilitating smoother cross-border transport and recycling processes.

Should battery chemistries be labeled?

The United Nations Economic Commission for Europe (UNECE) offers detailed guidelines on the labeling of hazardous materials, including battery chemistries. Including the manufacturing date, location, and batch number on the label helps in identifying potential defects and managing recalls.

Battery replacement label. Add your hand written variable information and seal to provide a scratch and chemical (solvents and oil) resistant, waterproof label.
