SOLAR PRO. Capacitor Hazardous Substances

Substance information for UN 3499 - Capacitor, electric double layer with an energy storage capacity greater than 0.3 Wh based on the Hazardous Materials Table (Title 49 CFR 172.101) ...

Liquids in capacitors 8 May 2019 II Authors Daniel Savi, dipl. environmental scientist, ETH Zurich1) Ueli Kasser, lic. phil. nat. (chemist)1) Rolf Widmer, research associate2) Organisation affiliation:

Material Name: ELECTRIC DOUBLE LAYER CAPACITOR SDS ID: 00233410 _____ Page 2 of 9 Issue Date: 12/08/2010 Revision: 1.0400 Print Date: 2/22/2011 Short Term: This product is considered to be nonhazardous, however the following effects may occur as a result ... Not Available NON-HAZARDOUS SUBSTANCE 40 - 60 Not Available ...

In new machines, capacitors containing PCBs have been replaced by less dangerous electrolytic capacitors. PCBs, or polychlorinated biphenyls, are toxic and carcinogenic chlorine compounds.

2. HAZARD IDENTIFICATION This capacitor is manufactured electronic product that contains primarily non-hazardous materials, including metal and plastic. Ultracapacitors ...

Hazardous components and substances. ... PCB-containing capacitors in older equipment (washing machines, microwaves, vacuum cleaners, etc.) In new machines, capacitors containing PCBs have been replaced by less dangerous electrolytic capacitors. PCBs, or polychlorinated biphenyls, are toxic and carcinogenic chlorine compounds.

Substance information for UN 3499 - Capacitor, electric double layer with an energy storage capacity greater than 0.3 Wh based on the Hazardous Materials Table (Title 49 CFR 172.101) to assist in preparing a risk assessment for loading, transporting and storing hazardous materials.

other hazardous substances) and the possible capacitor sorting techniques which can be envisaged in relation to relevant criteria (visual recognition or other), the technico-economic analysis of other existing treatment technologies, suitable for treating these components and guaranteeing correct disposal of hazardous substances other than PCB.

According to current state of knowledge, SEMICODE does not use any hazardous substances in its lighting and motor run capacitors as listed in guidelines 2003/11/EC and 2002/95/EC.

The capacitors are not rated as hazardous goods in transit and do not have to be marked under the Regulations for Hazardous Goods. ... RoHS: According to current state of knowledge, SEMICODE does not use any hazardous substances in its lighting and motor run capacitors as listed in guidelines 2003/11/EC and
