Does capacitor V3 work in the background?

Does not work for capacitor v3 Hello,yes,it is possible,you need to go to the settings and search for your application and turn on the gun in the background,click windows settings and applications and there you have properties and you have to mark it to work in the background,I did it and it's ok

Why is WebView not available in a capacitor application?

During the course of building complex applications,its sometimes necessary to perform work while the application is not in the foreground. The challenge with standard Capacitor applications is that the webview is not available when these background events occur,requiring you to write native code to handle these events.
