

Does field energy have battery storage at Oldham?

Field Energy's battery storage at Oldham. Image; Field Energy UK energy storage developer Field, has secured a £100 million (US\$128 million) fundraising round for expansion according to Sky News.

What is Field's Battery energy storage system?

Field's battery energy storage systems allow energy generated during times of lower demand to be stored and released to the grid during times of higher demand. Field is already operating its first site in the UK, a 20 MWh battery project in Oldham, Greater Manchester.

Will a second battery storage investment help UK energy industry reach net zero?

Gijs Voskuyl, Partner and Deputy CEO at DIF, said: "We're very excited to make a second investment in the battery storage sector which we see as a critical component for the UK energy industry to reach Net Zero and which we see as highly complementary to DIF's extensive renewable energy portfolio.

Will field meet net zero targets without a new energy infrastructure?

Commenting on the investment, Amit Gudka, Field CEO said: "We will not be able to meet net zero targets without significant investment in new energy infrastructure. Battery storage is a critical part of that infrastructure. The more we can build, the more effective mass-usage of wind and solar power will become.

Why did field invest 4.5 GWh?

The investment will allow Field to accelerate the development and buildout of its 4.5 GWh pipeline of grid-scale battery energy storage projects in the UK and Western Europe as it seeks to contribute to the renewable energy infrastructure needed to reach Net Zero.

What's going on with energy storage's 'Bess' money?

Field declined to comment when asked by Energy-Storage.news. The money will be used to expand the company's rollout of BESS, with several sites already operational in the UK and Italy the next target. Italy country head Emanuele Taibi spoke to Energy-Storage.news for a deep-dive article into the most recent edition (35) of PV Tech Power.

The news follows Field's recent £200m funding round led by DIF Capital Partners. With contracts signed, the Newport site is expected to be up and running in the third quarter of 2024. ... a global leader in advanced energy ...

Field has secured a pipeline of 160MW of battery storage sites in the UK, and begun construction of the first of these, the 20MW Oldham site. The company - originally called Virmati Energy - was launched at the beginning of 2021 by Bulb co-founder Amit Gudka. In its first six months it has raised £10 million in pre-seed capital and Series A funding, and is set to ...

We support and promote research and development projects for new energy storage technology and new applications by collaborating with universities, research and technology ...

Company Views - 11 Jun 2024 - Written By: Chris Wickins Using Energy Storage to Tackle Renewable Energy Waste - by Field, Eku Energy, Zenob? and Kona Energy Read Article News - 08 Apr 2024 - Written By: The Field Team Field Analysis: '920 million annual cost of "curtailment" could be cut 80% by using existing technologies like battery storage more ...
