

Should China's solar photovoltaic manufacturers tie up with foreign companies?

China's solar photovoltaic (PV) manufacturers should tie up with foreign companies to navigate geopolitical and trade challenges to maintain the country's grip on the sector and boost revenues after exports fell 35 per cent this year, a Ministry of Commerce official told industry representatives.

Are Chinese solar companies coping with a trade dispute?

Chinese solar companies are capable of mitigating risks while maintaining their competitive edge in the international market amid an ongoing trade dispute, as they have been stepping up efforts to diversify their global operations in recent years, experts and business insiders said.

Why do Chinese companies invest in solar panels?

The Chinese companies supply around 200 countries' needs of solar PVs, besides their domestic demand. Furthermore, to level up the competition, China invests in South Asian neighboring countries' solar projects. Investments in Vietnam, Malaysia, and other countries, made them worthy opponents able to supply the rest of the world as well.

How did China control the global solar market?

The increased installed capacity, the heavy manufacturing, and the availability of materials on its domestic land allowed China to control the global solar market by imposing quotas and restrictions on importing countries. We have shown that China alone installed more than 50 % of the total Asian solar capacity in the span of 25 years.

Is solar energy a good investment in China?

Solar energy is the most common, cheapest, and most mature renewable energy technology. With solar photovoltaics taking over recently, an in-depth look into their supply chain shows a surprising dependency on the Chinese market from the raw materials to the assembled PVs.

Are China's top solar makers accelerating global push?

Rooftop solar installations at an industrial park in Ji'an, Jiangxi province, on July 18. Photo: VCG China's top solar makers are accelerating their global push, but they're not all taking the same path.
