

The energy industry is in the first stages of a once-in-a-century transformation. And one of the most important aspects of this shift is that EVs, solar farms grid equipment, and ...

The CHIPS Act is an essential step to build a resilient supply chain for semiconductors. However, one should not downplay the importance of developing a sustainable supply chain for EV batteries that are critical for ...

2 ???&#0183; (Bild: Raitalinn - stock.adobe ) The semiconductor industry is poised for significant growth in 2025, driven by AI, electric vehicles, and high-performance computing, with revenue ...

SK Group, South Korea's second-biggest conglomerate after Samsung Group, said on Thursday it will invest 247 trillion won (\$195.24 billion) in the semiconductor, battery ...

TOKYO -- The government-backed Development Bank of Japan will invest more than 150 billion yen (\$1 billion) to build supply chain resilience in semiconductors, batteries ...

Despite its fundamental role in the development of the clean energy economy, semiconductor production comes with a significant environmental cost. The semiconductors industry is resource-intensive, using ...

Increasingly, power electronics are being used to integrate renewable energy and battery storage systems, enabling new grid services and the development of microgrids. It is estimated that ...

WASHINGTON, D.C. -- The U.S. Department of Energy (DOE) today announced that ten of its National Laboratories are expected to participate in the CHIPS ...

Focusing on the two emerging markets of new energy vehicles and industrial energy storage, Datang NXP recently launched a new battery management system (BMS) chip DNB1101A for ...

Semiconductors. Automobiles. Energy. Transportation. Retail. ... battery and chip firms seek bigger global reach ... Along with electric vehicles and other new energy vehicles (NEVs), EV batteries ...

When it comes to electric vehicles (EVs) batteries, this trend is not much different. Until recently, electric vehicle batteries were large, costly as well as inefficient. ...
