

How can retail investors benefit from the battery boom?

There are currently a handful of ways for UK-based retail investors to gain exposure to this prospective battery boom. Smart Metering Systems (SMS) derived around 12 per cent of cash profits (Ebitda) from its battery storage assets last year, a proportion that's likely to grow in the future.

Are battery funds a good investment?

As it stands, battery funds already have a relative lack of revenue security compared with other renewables trusts, for whom at least two-thirds of revenues are typically fixed. Stifel thinks the battery sector's attraction to investors would "increase meaningfully" if 30-40 per cent of revenues could be fixed for longer periods.

Would a long-term contract increase the battery sector's attraction to investors?

Stifel thinks the battery sector's attraction to investors would "increase meaningfully" if 30-40 per cent of revenues could be fixed for longer periods. Countries outside the UK offer greater potential for longer-term contracts, but all three funds have been signing one- and 15-year contracts over recent months.

What are the four key revenue streams available to batteries?

In this report, we take an in-depth look at the fundamentals of the four key revenue streams available to batteries: arbitrage, balancing, capacity provision and frequency response. We analyse the opportunities available now and present our views of how these markets will develop.

How do batteries make money in power markets?

Batteries make money in power markets through arbitraging the value between charging and discharging power. The greater the difference between high and low power prices across the day, the larger the profit for a battery asset.

Which UK battery storage projects will be commercially operational in 2024?

Energy storage developer Eku Energy is building two UK battery storage projects - with a combined capacity of 130MWh - in Basildon, Essex and Loudwater, Buckinghamshire. Both projects are expected to be commercially operational by the end of 2024.
