Communication network cabinet check battery life code

For our off-grid system we are using the 24V EG4 LifePower4 batteries, and just upgraded to an EG4 3000W inverter. When we go through the set-up for the inverter and change the battery type to LI4 (EG4 protocol), we get Warning Indicator 19 (Lithium Battery communication failure) Everything seems to be working fine.

It collects battery status data from the downstream iBAT groups through wireless communication, and sends the data to the ECC800-Pro, UPS, and the third-party network management system (NMS) through COM or PoE ports.
