

Digital amplifier powered by lithium battery pack

What is a rechargeable amplifier power pack?

The Rechargeable Amp Power Pack offers a convenient reusable power solution for select Roland mobile amplifiers that support battery operation, including the CUBE Street EX, AC-33 Acoustic Chorus, and other models. The one-piece design pops easily into the back of the amplifier, eliminating the need to fuss with multiple AA-size batteries.

Can a rechargeable AMP Power Pack be used for charging?

*Up to twice the runtime is possible compared with eight AA NiMH batteries with 2,450 mAh capacity. Actual runtime and performance can vary with the conditions of use. Products that support the Rechargeable Amp Power Pack will be listed here as they become available. Unless noted, the AC adaptor included with the amplifier can be used for charging.

What is a Spark Live Amp?

Plug in guitar, bass, vocals, keys--or all at once. Fueled by Sonic IQ Computational Audio, this 4-channel smart amp and PA system is packed with amps, effects and a mixer. Miraculously compact and loud, with optional battery power, Spark LIVE delivers big, adaptive sound for any event. Frequently Bought With... Born to play.

What type of battery does the D6-58 Acoustic amplifier use?

The D6-58 Battery Powered Acoustic Amplifier is equipped with a user removable/swapable battery module. We choose Lithium Iron Phosphate (LiFePO₄) type of batteries for its advantages in safety properties. LiFePO₄ is thermally and chemically stable, reliable without the possibility of lithium fires.
