

Fiji Battery Explosion Proof Box Price List

What are explosion proof battery enclosures?

Internally, they are provided with a non-static PVC lining. And last, but certainly not least, to cover just about every conceivable environmental eventuality, our explosion proof battery enclosures are good for temperatures ranging from minus 40 to plus 55 degrees Celsius.

What is a Pyroban explosion protection battery?

The Pyroban explosion protection offshore battery is designed for use in hazardous areas and are corrosion resistant with a 316 stainless casing. The 12V and 24V units contain deep cycle batteries protected with a 50A MCB isolator. These ATEX batteries are not suited to engine cranking applications.

Which battery box is suitable for all environmental locations?

Available in 316L stainless steel and galvanised or painted steel, the battery box is suitable for all environmental locations. PMAP's battery boxes are the most flexible and user-friendly units on the market due to each box being built to customers' bespoke sizing and specifications.
