

Where are frolyt capacitors made?

Frolyt has been developing and manufacturing aluminum electrolytic capacitors at its Freiberg site in Germany for 73 years. With 84 employees and an experienced development department, we produce capacitors for the standard application or according to customer-specific requirements.

What is aluminum electrolytic capacitor SMD (chip)?

Aluminum electrolytic capacitors SMD (chip) for surface mounting in general industrial electronics and special electronics such as automotive industry. Special feature: 150°C /1,000h SMD design ERST 150°C EN 11-2022

Can a capacitor be soldered from a blister belt?

Frolyt Kondensatoren und Bauelemente GmbH has developed a socket as an SMD variant for holding aluminum electrolytic capacitors, which can be reflow soldered from the blister belt. This socket design eliminates the need for manual soldering of the capacitor, which results in significant time and cost savings when assembling modules.

What is a frolyt capacitor?

Up to 80,000 µF with extremely reduced operating residual current - Frolyt capacitors enter new generation. FROLYT sets new standards, fabulous capacities up to 80.000 µF (21,8,0 x 35,5 mm) at 4 V and fantastic operating residual currents of 8,5 Nano-Ampere at 20°C bring immense advantages for your battery based applications.
