

How to hide solar panels on your roof?

To hide solar panels on your roof, you could opt for the all-black solar panels or aluminum coverings that mimic your roof's color. Otherwise, you may choose in-roof solar panels, building-integrated solar panels, solar roof skins, or invisible photovoltaic roof tiles.

Should I integrate solar panels into my roof?

Integrating solar panels into the roof brings both aesthetic and practical advantages: Click [HERE](#) for our guide to Integrated solar panels, which highlights the issues to consider when designing your roof and comparing integrated solar panels with panels on rails over the top of the tiles.

What are roof-integrated solar panels?

The majority of roof-integrated solar panels on the market are pre-framed and available in one orientation. The GB-Sol system uses a hidden rail system which is fitted to the roof battens, and this can be designed for any shape or size of solar panel.

Can solar panels be hidden?

Yes, hiding solar panels can be done with disguise, inbuilt systems, and clever innovative multifunctioning property features. Some people choose not to install them because they don't want their home's exterior changed or even as a way of protesting against fossil fuels.

Which solar panel is best for a slate roof?

For a truly all black panel the Sunpower Maxeon technology allows black backing with minimal affect on performance. A great solution for modern slate roofs as they blend in so well, looking very much like a Velux window. The creme de la creme of solar panel aesthetics, just one of the reasons Sunpower are so popular with consumers.

Can solar panels be installed on a roof?

The energy increase on a roof mounted system is 1-5% while up to 25% can be achieved on a ground mount that's above light coloured ground. Our PV Sol software will provide accurate forecasts if you're keen to explore Bi-facial panels. Who said you had to put panels on your roof? In-Roof Solar PV mounting.
