

A router typically work on 12V. With a UPS, you start with a 12V battery which UPS boost its voltage to 220v (or 110v) then your router adaptor change it back to 12V to power the router. You lose a lot of power in this conversion alone. Probably more power is lost to this conversion than power consumed by your router.

Anker SOLIX C1000 Portable Power Station, 1800W (Peak 2400W) Solar Generator, Full Charge in 58 Min, 1056wh LiFePO4 Battery for Home Backup, Power Outages, and ...
