

Are there suitable energy-saving retrofit technologies for existing hotels?

The suitable energy-saving retrofit technologies for existing hotels were proposed, offering choice of energy-saving retrofit for similar public buildings in hot summer and cold winter areas. 1. Introduction The energy consumption of existing buildings is an important part of the total energy consumption of buildings.

Does energy-saving retrofitting of existing hotel buildings save energy?

In this study, the efficacy of energy-saving retrofitting of existing hotel buildings was examined. The hotel energy consumption characteristic was analyzed via an energy consumption survey, and energy saving benefits were evaluated via field tests and mathematical statistics analysis.

Can hotel buildings be retrofitted?

Therefore, this study used hot summer and cold winter areas (a city in the Jiangsu Province, China) as research objects to identify the retrofit technologies of existing hotel buildings that are suitable for promotion, and propose additional retrofitting suggestions to act as a basis for retrofitting similar public buildings.

Can hotel buildings be retrofitted in Jiangsu Province?

6. Conclusion This research analyzed the cases of retrofit of existing hotel buildings in Jiangsu Province, which is located in the hot summer and cold winter area, and proposed a post-evaluation method for retrofit of such buildings.

Are hotel buildings energy-saving?

The energy cost is increasing year by year. The main energy consumption system of hotel building is composed of air conditioning, living hot water supply, kitchen, lighting and power system, therefore, the research is aimed at the analysis of the common energy-saving transformation technology in the existing hotel buildings. Table 2.

How does a retrofit affect the energy consumption of a hotel?

Take Hotel 6 as an example to show the changes in the proportion of energy consumption of each subsystem of the hotel before and after the retrofit. After the retrofit, the total energy consumption has been reduced by 30.5%, of which the proportion of energy consumption of lighting system has dropped significantly.

The results showed that the energy consumption of hotels after energy-saving retrofit is reduced by more than 25% compared to the consumption before. Among them, ...

Mentioning: 4 - With the improvement of China's economic strength, the energy consumption of public buildings is continually increasing, notably for hotels. The energy consumption of a hotel ...

High-Efficiency Solar Panels: Shenzhen SunPower specializes in producing high-efficiency solar panels using

advanced technologies. Brand Reputation: The ...

Vietnam's industrial parks retrofit solar power to attract investors Source: Xinhua | 2024-09-03 17:11:15 | Editor: huaxia HANOI, Sept. 3 (Xinhua) -- Industrial parks in Vietnam have retrofitted rooftop solar power systems to increase competitiveness and attract investors, Vietnam News Agency reported Tuesday.

What is the opportunity? In the United States, there is over 30 GW of operating utility-scale solar PV capacity. If an additional 5% of generation could be achieved from these assets, more than 1. ...

1. China's Top 10 Solar Module Manufacturers 1.1. JA Solar Technology JA Solar Technology is a company specializing in photovoltaic power generation technology, in 2023 solar module shipments reached 57.094GW, ...

Haoli Light China Retrofit LED Hotel Downlights Downlight Round COB Mini Ceiling Manufacturing Energy Saving Light Source Nondimmable LED Panel Light Purchase Qty.: (Pieces)

Despite the importance of building green retrofit globally, the rate of green retrofitting of existing buildings is still low. As an example, the rate is only 0.4-1.2% per year in Europe (Pombo et al., 2019). There are various retrofitting barriers that hinder the promotion of green retrofitting existing buildings, such as the uncertainties with respect to energy saving, ...

China Retrofit wholesale - Select 2025 high quality Retrofit products in best price from certified Chinese LED Lamp manufacturers, LED Light suppliers, wholesalers and factory on Made-in-China ... 10 Working Hours Gel Battery Hanging Solar LED Street Lighting Solar LED Street Light Retrofit. US\$ 48.8-78.8 / Piece. 1 Piece (MOQ) Yangzhou ...

During the "Thirteenth Five-Year Plan" period, Jiangsu Province vigorously developed green buildings and further promoted energy-efficient buildings, and carried out the energysaving retrofit of ...

Retrofit: Case study: Egypt: Hotel: 13 [31] Historic Environment: Policy and Practice ... Another study conducted in China states the potential of using Solar PV systems to help ... there are other challenges involved with the heritage values that need to be addressed in historical housing retrofit. For example, solar panels should not be ...
