

What are integrated solar panels?

In essence,integrated solar panels are the same as traditional solar panels. They absorb sunlight and convert it into usable electricity for your home. The difference is that instead of being mounted on top of your roof,they are built into its structure. This is done by replacing a section of your roof's materials with solar panels.

What is the difference between integrated solar panels and regular solar panels?

The difference with integrated solar panels is how they're installed. Regular solar panels are placed on top of roof slates or tiles. This is why they're known as on-roof panels. Integrated solar panels - or in-roof panels - are fixed into the roof itself. This is done by:

Do integrated solar panels go on the roof?

Like standard solar panels,integrated panels go on the roof,but they're embedded within the structure rather than sitting on top of it. This post looks at what you need to know about integrated solar panels so you can make an informed decision on whether they could be right for your home. We'll cover: How integrated solar roof panels work.

How do integrated solar panels work?

Integrated solar panels are installed in the structure of your roof. They work like traditional solar panels,absorbing sunlight and converting it into electricity for your home. What are the disadvantages of integrated solar panels?

Are integrated solar panels right for Your House?

If you agree with the older generations in our study that traditional solar panels are unattractive,integrated panels might be for you. Since they're installed as part of a roof's structure,integrated solar panels sit snugly with the roof tiles and blend in more seamlessly. It's a great look for any style of house.

What are the different types of integrated solar panels?

In-roof frames: These integrated solar panels replace sections of the roof tiles or slates, sitting flush with the underlying roof structure. These frames are commonly used in both home renovations and new builds.
Bespoke integrated panels: These solar panels are specifically designed and manufactured for in-roof installation.
