In addition, the surface area of a solar panel is typically between 1.6 m² and 2 m² (17.22 to 21.53 ft²). In the UK, the size of domestic solar panels ranges from 250W to 450W. For commercial installations, the size of solar panels is usually between 400W and 600W. The size of a solar panel affects efficiency and power output.

How much power does a small power station need?

A small power station, around 150Wh, will do just fine for powering just a few devices, like phones or tablets. But if you are trying to keep your mini-fridge, lights, or machine running, you'll need something more substantial, like a 500Wh or 1000Wh model. If it will be a few hours, you may get by on something with a small capacity.

The portable power station industry has taken some massive leaps forward in 2024. From ground-breaking innovations, like the first power station with a 50-amp plug to the launch of several units that were designed to integrate seamlessly with your home's power system, this year has been huge for off-grid enthusiasts and emergency backup users alike.
