2.2uF/100V electrolytic cap cost 1/15 of same value polypropylene The reason for low cost is mainly, as I can think: 1. lower electrical quality 2. much lower cost to make (filmcaps are not very easy to make) No wonder some try to sell audiophile electrolytics. Chances to profit, make money, is good if you can make people believe they get value ...

This means a coupling capacitor is needed at the input--a very large-valued coupling capacitor. For example, in the circuit above, the input impedance is around 700 ohms, which ...
