

# How to bargain when buying a battery pack

Do you need an external battery pack?

Modern gadgets are power hungry. If you want to make it through a long commute or a cross-country flight without having to plug your tablet or gaming device in, you're going to need an external battery pack to keep the electrons flowing. Read on as we show you how to shop for a pack that will meet your needs and keep your screens glowing.

When should you use a battery pack?

You use battery packs most often when you're traveling, and since you'll likely have the battery pack in hand when you're rooting around in your bag or luggage looking for cables and whatnot in an unfamiliar setting, that burst of light is more than handy.

How do you charge a battery pack?

Instead of plugging your charging cable into the wall, you instead plug the charging cable into the battery pack and fill up the device's batteries that way. Not all battery packs are created equal, however, and even if the build quality is good, you can easily end up with an external battery pack that doesn't fit your application and power needs.

How do I choose a battery pack?

Use the following checklist to ensure you end up with a battery pack that meets your needs. 1. Write down your total mAh needs and multiply that value by the percentage you want to extend your battery life (0.5 for 50%, 1.0 for 100%, 1.5 for 150% and so on). 2.

Do you offer batteries in multipacks?

We offer batteries in huge multipacks to help you save while you stock up to keep all of your household gadgets running for plenty of time to come. Keep an eye out for offers too, as we regularly hold sale events that will help you to save even more on everyday items like batteries.
