On this page we will show you the electrical work involved in replacing a Power One PVI 3.0 or 3.6 inverter with a Solis model supplied by us. By following these instructions a competent DIYer with basic tools will be able to replace their Power One inverter.

How to replace a power one inverter?

By following these instructions a competent DIYer with basic tools will be able to replace their Power One inverter. You're going to need some good quality insulated electricians screwdrivers, an insulated wire cutter/stripper, a combi drill and the appropriate fixings for the type of wall the inverter is fixed to.

How do I install a new Solis inverter?

Your Solis inverter includes an a.c. connector which will need to be put onto the free end of the a.c. cable. This is in a plastic bag underneath the new inverter. The wires coming from the a.c. cable are probably too long to fit within the new connector. We recommend shortening them to approximately 30mm each.
