

Can I send batteries abroad?

If you're trying to send batteries abroad, the most important thing you need to pay attention to is that they're packaged carefully. Even if you obey the shipping restrictions, not knowing how to safely pack batteries (or other electronic items, for that matter) can land you in a whole heap of trouble.

Can I send lithium batteries on my own?

**THIS WILL ALMOST ALWAYS MAKE IT UNECONOMIC TO SEND LITHIUM BATTERIES ON THEIR OWN.** For deliveries of shipments with lithium batteries included in the equipment to an overseas destination - be they laptops, mobile phones or more specialist equipment - trust us to get your shipments to their destination without the risk of problems arising.

What types of batteries can I mail or ship internationally?

There are many types of batteries that have different requirements when you wish to mail or ship them internationally: Wet batteries, also known as flooded lead-acid batteries, are commonly found in vehicles and backup power systems.

How should lithium batteries be packaged?

When preparing shipments containing lithium batteries, it is important to ensure the batteries are not in any way defective, damaged, or have the potential to produce a dangerous evolution of heat, fire or short circuit. When packaging lithium batteries for shipment, strong rigid outer packaging must be used.

Can You Send lithium batteries by air?

IATA is actually quite adamant about not allowing anyone to send lithium batteries by air. There is a catch, though: this restriction only applies to lithium metal batteries by themselves, i.e. not placed inside or next to a device they are meant to power.

Can I send lithium-ion batteries within the UK?

When exposed to high temperatures, lithium-ion batteries have been known to overheat and even explode. For this reason, we have some restrictions when sending lithium-ion batteries through our network. You can send lithium-ion batteries within the UK, as long as the battery is fitted within the device.
