

How to turn on the newly purchased solar power supply

Do I need to turn my solar system off?

Solar panels are a brilliant investment, offering a clean and sustainable way to power your home while reducing your electricity bills. However, there may be situations where you need to turn your solar system off, such as for maintenance, repairs, roof cleaning, or even during firefighting operations.

How do I connect my solar system to the utility grid?

Connecting your solar system to the utility grid is a critical step in the activation process. Here's what you need to do: **Grid Connection Point:** Identify where your solar system connects to the utility grid. This is usually located near your main electrical panel or utility meter.

How do I connect my solar panels to the mains?

Before you start connecting your solar panels to the mains, you will need to turn off the mains supply to your property. This is important to ensure that there is no risk of electric shock or damage to your equipment during the installation process. Once the mains supply has been turned off, you can begin connecting the inverter.

How do you turn a solar inverter back on?

Simply do all the procedure in reverse. Start with turning on the DC side and then turning on the AC side. If it happens that your inverter does not come online again, you will need to call your solar installer. The steps that we have just explained refer to all PV systems.

How do you disconnect a solar system from a utility grid?

Turn off the AC disconnect switch to disconnect the solar system from the utility grid. **Breaker Switch:** Locate the breaker switch dedicated to your solar system. Flip the breaker switch to the "off" position to cut off the power supply from the solar panels.

How do you disconnect a solar system?

Locate the AC disconnect and breaker switch in your solar system and follow these steps: **AC Disconnect:** Find the AC disconnect near your utility meter or main electrical panel. Turn off the AC disconnect switch to disconnect the solar system from the utility grid. **Breaker Switch:** Locate the breaker switch dedicated to your solar system.
