

Installation of battery pack in computer room

Can a battery be installed in a computer room?

Sometimes they are installed in the same room as the UPS (i.e., electrical equipment room). Local or regional codes may dictate whether batteries are permitted in an electrical room. Smaller UPS systems (e.g, up to 250 kVA) are commonly installed directly in the computer room along with their respective battery cabinets.

How do I set up an UPS battery room?

Open-rack battery rooms must be adjacent to the UPS room. Battery cabinets must be adjacent to the UPS equipment. Cable lengths from multiple cabinets should be kept as nearly identical as possible to prevent voltage drop variations. One cabinet should be able to hold at least one complete string of cells.

Can a battery be installed on an open rack?

Batteries installed on open racks almost always require installation in a battery room. Sometimes they are installed in the same room as the UPS (i.e., electrical equipment room). Local or regional codes may dictate whether batteries are permitted in an electrical room.

Can you put a battery in an electrical room?

Local or regional codes may dictate whether batteries are permitted in an electrical room. Smaller UPS systems (e.g, up to 250 kVA) are commonly installed directly in the computer room along with their respective battery cabinets. The UPS and/or battery cabinets might be configured to look like standard computer equipment racks.

How close should a battery room be to an ups?

As mentioned earlier, batteries should be as close as possible to the UPS. The reasons are twofold: (1) the longer the cable runs, the greater the voltage drop; and (2) the longer the cable runs, the greater the potential for damage and/or short circuit. Open-rack battery rooms must be adjacent to the UPS room.

Are open rack batteries safe?

Open rack batteries expose potentially lethal voltage to any person coming in contact with them. Therefore they must be installed in battery rooms in which room access is restricted to authorized personnel only. Authorized personnel must be trained in battery safety.
