

# Installing solar power in a home is not illegal

Are solar panels legal?

However, it's crucial to understand that while installing solar panels is legal, certain conditions must be met. For most domestic properties, solar panel installations are considered a "permitted development" and do not require planning permission, provided they respect certain size criteria.

Do I need planning permission to install solar panels?

In most cases, planning permission is no longer required to install solar panels on the roof of your private home thanks to the recent extension of the 2008 'Permitted Development' rules by the UK Government. It is therefore typically unnecessary to seek planning permission when installing domestic solar panels.

What happens if you install solar panels without planning permission?

If you install solar panels without the necessary planning permission or in breach of regulations, you could face several legal and financial consequences, including the removal of your panels, fines, legal action, compromised insurance policies, and personal risks such as to your safety and diminished property value.

Can I install solar panels on my own property?

And while you can legally install your own solar panels on your own property, it's certainly worth being aware of the responsibilities that come with it and what else it may impact. Firstly, if the solar panels are not installed by an MCS-accredited installer you will not be able to sell your property with the panels included.

Are solar panels allowed on a property?

Certain conditions must be met for permitted development rights for solar panels which include: Panels must not protrude more than 200mm from the roof. This helps to protect the appearance of the building. The solar panels must not affect the structure of the roof or the appearance of the property.

What are the regulations for installing solar panels on your property?

Arguably, the most important regulations for those looking to install solar panels on their property are those that consider the placement or positioning of the solar panels. These vary depending on whether your property is for commercial or domestic purposes.
