

How do you store rechargeable batteries?

Place your batteries in a vapor-tight container, then keep them at room temperature away from direct sunlight. To avoid losing charge and causing a fire risk, don't store coins or other metal objects with your batteries. For tips on how to store rechargeable batteries, keep reading!

Can you store used batteries with new batteries?

Do not store used batteries along with new batteries. You cannot tell from the outside whether a battery is empty or full. If you store them separately, you immediately know which batteries you can still use and which you cannot. What about batteries that you have removed from your device but that are not completely empty?

What are the best practices for storing batteries at home?

The best practices for storing batteries at home include keeping them in a cool, dry place away from direct sunlight and extreme temperatures. It's also important to store them in their original packaging or in a battery organizer to prevent contact with metal objects that could cause a short circuit.

How do you preserve battery life?

DO preserve battery life by switching off a device and removing the batteries when it's not being used, and is not expected to be used for extended periods of time. DO practice proper battery storage by keeping batteries in a cool, dry place at normal room temperature. It's not necessary to store batteries in a refrigerator.

How do you store a battery if it's flooded?

Remove batteries from infrequently used electronics between uses. When batteries are left in electronic devices, they discharge much faster than if left in storage by themselves. Storing wet (flooded) lead-acid batteries long-term is not recommended. These batteries require regular maintenance to top up water levels and prevent corrosion.

Why should you store batteries in your home?

Batteries come in many different shapes, sizes, and applications, and it can be very helpful to have several different kinds stored in your home for later use. Proper storage extends the life of the batteries and prevents them from becoming a safety hazard, and allows you to easily find them when you need them.
