

Large battery charging station pictures and prices

What is a charging station?

A 'charging station' is simply a public location for charging an electric car. It applies to everything from a single charger in a supermarket car park, to a purpose-built charging forecourt - much like a traditional petrol station, but with eight or more chargers. Large charging forecourts will usually be found along motorways or busy A roads.

How much does it cost to charge a 70 kWh battery?

If you were to fully charge a 70kWh battery at that price, it would cost you £56. Public slow and fast chargers are cheaper, at an average cost of 57p per kWh, but it remains an expensive alternative to charging at home. If you intend to go on longer journeys and use charging stations frequently, there are ways to cut your costs.

How do I find an electric car charging station?

Finding an electric car charging station is fairly straightforward, and you can do it at home or on the road. ZapMap is a handy website that provides an interactive map of the UK's EV charging stations, with filters for different charger types and speeds. It is also available as an app.

Is price information available for all charging stations?

Price information is available for several charging networks and is updated regularly. In some countries, price information is already available for most charging stations, while in other countries we are working on adding prices for more networks.

Where can I find EV charging stations in the UK?

ZapMap is a handy website that provides an interactive map of the UK's EV charging stations, with filters for different charger types and speeds. It is also available as an app. Most modern electric cars have an EV charging station finder built into the infotainment system.

Are electric car charging stations becoming more common?

Electric car charging stations are now more common than ever, as more drivers make the switch from combustion cars to electric vehicles (EVs).
