How much does a p-type cell cost?

Concerning P-type cells, the pricing for 182mm and 210mm P-type cells is set at 0.37 yuan and 0.38 yuan per watt, respectively. Notably, P-type cell prices have dipped below the cost line, leading to the essentially complete shutdown of its production capacity.

Why are n-type polysilicon prices declining?

Regarding order prices, N-type polysilicon has maintained stability, primarily fueled by increased N-type wafer output and heightened demand resulting from a shift in part of the P-type wafer production capacity to N-type wafers. Conversely, P-type polysilicon prices have experienced fluctuations and a continued decline.
