

Where can I buy lead acid & lithium batteries in New Zealand?

For sales, service and repairs, we partner with small to large distribution centres and warehouses throughout New Zealand. We carry a large range of high quality lead acid & lithium batteries at our store in Palmerston North. Buy online, or visit us at 187 JFK Drive.

What is a lead acid battery?

These batteries are commonly used in vehicles, boats, and uninterruptible power supplies (UPS) to keep devices running smoothly during blackouts or emergencies. Ivent stocks a wide range of gel, AGM, VRLA and flooded batteries. These batteries are also referred to as acid batteries or simply lead batteries. But how does a lead acid battery work?

Are lead acid batteries a good source of power?

When it comes to power, lead acid batteries are the trusted source for automotive and industrial applications. They have been the go-to energy source for decades, providing reliable power in a variety of applications.

Why should you choose a lead battery?

Choose a quality lead battery to ensure that you get the most out of your energy source. Ivent is now also stocking a range of Lead carbon batteries. This new technology provides the lower cost benefits of lead-based technology but has a very high cycle life and deep discharge characteristics like Lithium.

How long does it take to ship a lead acid battery?

Mr Positive uses registered specialised hazard couriers to ship certain lead acid batteries around NZ. Shipping of this product range requires extreme care. Generally items are shipped the same day an order payment is confirmed. Due to the nature of the product and volatile chemicals, the transit time may take 2-5 days depending on your location.
