

What is lithium ion battery capacity?

Lithium ion battery capacity is the utmost quantity of energy the battery can store and discharge as an electric current under specific conditions. The lithium ion battery capacity is usually expressed or measured in ampere-hours (Ah) or milliampere-hours (mAh).

What are the most important lithium ion battery specifications?

Here we will look at the most important lithium ion battery specifications. The capacity of a cell is probably the most critical factor, as it determines how much energy is available in the cell. The capacity of lithium battery cells is measured in amp-hours (Ah) or sometimes milliamp-hours (mAh) where 1 Ah = 1,000 mAh.

What is a mAh battery?

Practically, we see mAh used in any electronic device with a battery, from phones to Bluetooth speakers. These devices range from hundreds of milliamp hours into the thousands in terms of capacity, but they're all measured the same way. One thing to note here is that milliamp hours are only a measure of capacity.

What is the difference between a Mah and a Li-ion battery?

Even though the mAh ratings are the same, these batteries have different energy capacities. The batteries have drastically different chemical compositions, which changes their nominal voltages. Alkaline: 1.5 V; rechargeable NiMH: 1.25 V; Li-ion: 3.6 V.

What is the difference between AA and Li-ion batteries?

The batteries have drastically different chemical compositions, which changes their nominal voltages. Alkaline: 1.5 V; rechargeable NiMH: 1.25 V; Li-ion: 3.6 V. The "2,400 mAh" Li-ion battery contains almost 3x the energy capacity of a "2,400 mAh" rechargeable AA battery! These three batteries have the same mAh value, but different capacities!

What determines the capacity of a lithium battery?

The capacity of a cell is probably the most critical factor, as it determines how much energy is available in the cell. The capacity of lithium battery cells is measured in amp-hours (Ah) or sometimes milliamp-hours (mAh) where 1 Ah = 1,000 mAh. Lithium battery cells can have anywhere from a few mAh to 100 Ah.
