

Are patent disputes over battery technology on the rise?

Here, patent disputes over the future technology of batteries are currently on the rise. China-based company Ningde Amperex Technology, better known as ATL, is one of the world's biggest manufacturers of rechargeable lithium-ion batteries.

Will more litigation prevent Chinese batteries from coming to market?

But she also noted more litigation does not necessarily mean Chinese batteries will be prevented from coming to market. Instead, it's more likely companies will shift around build expenses like paying out IP royalties into their business plans.

Why did the ITC allow SK Innovation to import lithium-ion batteries?

First, the ITC permitted SK Innovation to continue importing components for domestic production of lithium-ion battery products for Ford Motor Co.'s electric F-150 production for four years and for Volkswagen of America's MEB line for the North America Region for two years, in order to permit the auto-makers to transition to new domestic suppliers.

Did SK Innovation & SK battery America resolve a dispute with LG Chem?

Following a favorable Initial Determination ("ID") by the International Trade Commission (ITC) in March, Jones Day clients SK Innovation Co., Ltd. and SK Battery America, Inc., resolved their global dispute with LG Chem Ltd. (and its recently formed LG Energy Solution Ltd.).

Are lithium ion batteries worth it?

While batteries have long been critical for products like phones and laptops, their relevance and value have grown alongside the expanding global renewable energy market. Yet there are only a couple of dominant lithium ion battery companies.

Why are Chinese battery companies suing EV manufacturers?

The lawsuits Preston said, involve high profile Chinese battery manufacturers like COSMX, ATL, and CATL (which is particularly important for the EV market). That means Chinese companies are to a degree competing among themselves to attain the best market position in the U.S. -- in part by defending their IP.

5 ???&#0183; Increased usage of lithium-ion batteries aboard yachts and superyachts presents significant risk for the maritime industry and it is compounded by the rapid evolution of ...

Electric cars Opel and supplier CATL succeed in e-battery dispute with MU Ionic. D&#252;seldorf Regional Court has found in favour of carmaker Opel and Chinese lithium-ion ...

Choosing the right battery technology (e.g., lithium-ion, flow batteries, solid-state batteries) is also crucial.

Typically, we see contractors undertake both a design and ...

Check that lithium-ion battery installations meet the Australian Standard and are installed by a competent person. Develop a procedure to manage the risks associated with charging ...

This was a notable dispute because of the importance of lithium-ion battery technology in the electric vehicle industry. Key players in this technical field will, of course, try ...

A major factory fire has sent a giant plume of black smoke across Melbourne's south-east and further escalated a dispute ... said a caller to triple zero reported that lithium-ion batteries had ...

When clients retain Rimkus to investigate matters related to lithium-ion batteries, we can analyze property damage claims, fire incidents, and personal (burn) injuries. By collaborating with other ...

The agreement to settle the legal disputes relating to lithium-ion batteries for electric vehicles was announced on April 11, 2021 (Korea time). Following the announcement, the pending ITC ...

Yes, lithium-ion battery makers have been sued in a class action lawsuit. The lawsuit involves indirect purchasers of products using lithium-ion batteries, such as portable ...

The ternary lithium battery, and believes that it will become the main battery type in the field of power batteries, especially in the field of passenger cars. Compared with lithium iron ...

Battery technology ATL and Hogan Lovells victorious in lithium-ion battery battle with CosMX Power. Following a ruling from Munich Regional Court, Acer may no longer sell ...
