

What is the future of lithium-ion batteries?

The future of lithium-ion batteries, including threats and opportunities, and recycling potential. Analysis of existing and potential end-uses including consumer electronics demand, glass/ceramics and other non-battery end-use evolution. Supporting demand data to 2040 on lithium demand by end-use and lithium EV demand by region.

When will lithium-ion batteries become more popular?

It is projected that between 2022 and 2030, the global demand for lithium-ion batteries will increase almost seven-fold, reaching 4.7 terawatt-hours in 2030. Much of this growth can be attributed to the rising popularity of electric vehicles, which predominantly rely on lithium-ion batteries for power.

What is the global lithium-ion battery market size?

The global lithium-ion battery market size was estimated at USD 54.4 billion in 2023 and is projected to register a compound annual growth rate (CAGR) of 20.3% from 2024 to 2030. Automotive sector is expected to witness significant growth owing to the low cost of lithium-ion batteries.

How does battery technology affect lithium demand?

Long-term battery technology shifts and EV powertrain developments and their impact on lithium demand. A full review of lithium used in lithium-ion batteries, including the growing popularity of LFP, NMC and NCA battery cathode chemistries. Review of loadings of lithium by battery technology.

Why is lithium a commodity in China?

China produces an estimated 80% of the entire world's lithium-ion batteries each year, and about 60% of all electric vehicle batteries. As a result, Chinese prices for battery-grade lithium (i.e. lithium carbonate with over 99.5% purity) have become one of the foremost proxies for the price performance of lithium as a commodity.

What is the demand for lithium-ion batteries in 2024?

That is more than 2.5 times annual demand for lithium-ion batteries in 2024, according to BNEF. While demand across all sectors saw year-on-year growth, the EV market - the biggest demand driver for batteries - grew more slowly than in recent years.
