

Is the UK a good place to invest in battery energy storage?

The UK has been positioned as the third most appealing market globally for investment in battery energy storage systems (BESS).

Are battery energy storage systems a good investment?

An expanding role for battery energy storage systems (BESS) in a more volatile grid is seeing demand and investment opportunities soar. Our new ranking of the top global markets for BESS investment can guide strategies, and four factors can help potential investors frame their approach.

Which countries are the best markets to invest in battery storage?

The report's new battery storage ranking identifies the US and China as the top two markets for BESS investment, citing robust policy support and ambitious cost reduction targets. Global BESS deployment is projected to quadruple by 2030, reaching 572 GW/1,848 GWh.

Will NatPower invest £10bn to deliver UK's largest battery storage projects?

RENEWABLES project developer NatPower has promised to invest £10bn (US\$12.8bn) to deliver the UK's largest portfolio of battery storage projects.

Which UK battery storage projects will be commercially operational in 2024?

Energy storage developer Eku Energy is building two UK battery storage projects - with a combined capacity of 130MWh - in Basildon, Essex and Loudwater, Buckinghamshire. Both projects are expected to be commercially operational by the end of 2024.

Where are the world's top battery investment markets?

To help cut through the complexity, EY teams have identified and ranked the attractiveness of the world's top global battery investment markets for the first time. (This assesses factors including installed capacity and pipeline, as well as government support, such as tenders, subsidies, policy and deployment targets.) 1. US 2. China Mainland
