

Will solar power be required on new homes?

The bill would require the installation of solar photovoltaic generation equipment on new homes. The full text of the bill (PDF) contains four clauses. No explanatory notes or other accompanying documents have been published.

Will the government add solar panels to new homes?

Most of the available stakeholder commentary has focused on the government's FHS proposal on adding solar PV panels to new homes, but there has been some support specifically for this bill. The MCS Foundation, a charity that oversees the standards for home renewable energy systems in the UK, has supported the bill.

What is the private members' bill on new homes (solar generation)?

This Library briefing provides an overview of the bill and key areas of debate. The Private Members' Bill on New Homes (Solar Generation), sponsored by Max Wilkinson (Lib Dem), will have its second reading on 17 January 2025. The government has set a mission to make Britain a clean energy superpower.

Should a new home require solar PV panels?

The 2023/24 consultation on the detailed specification for the FHS sought views on whether to require solar photovoltaic (PV) panels for new homes. Solar PV generation turns the sun's energy into electricity. Option 1 would have required solar PV panels covering the equivalent of 40% of a new home's ground floor area.

What will changes to permitted development rights mean for solar panels?

Changes to permitted development rights rules will mean more homeowners and businesses will be able to install solar panels on their roofs without going through the planning system. The Government is working to support household renewables through community benefits, energy efficiency schemes and the Smart Export Guarantee.

What is a solar photovoltaic Bill?

A Bill to require the installation of solar photovoltaic generation equipment on new homes; to set minimum standards for compliance with that requirement; and for connected purposes.
