

How much does a Tesla battery overhaul cost?

The Tesla dealerships can only offer to replace the battery with a new or exchange battery. This is usually at the cost of between £13,000 and £15,000 with a new one being closer to £20,000. Whereas, our standard Tesla Model S and Model X battery overhaul service is usually around just £5,200. Therefore, meaning we could save you up to £14,800!

How do refurbished batteries work?

How we do it: We exchange all your battery's internal cell with brand new ones. A-grade battery cells used to recell your battery pack. Your refurbished batteries will look as good as brand new and will work in exactly the same way as it used to. We recell, refurb, and repair Lithium (Li-Ion), Ni-Mh and Ni-Cd battery packs.

Can a battery pack be rebuilt?

Get your battery pack rebuilt with County Battery Services pack rebuilding service. Whether it is Ni-Cd, Ni-Mh or Lithium, we can repair and improve your battery packs to an upgraded standard by exchanging your internal cells to brand new quality battery cells of the same or higher capacity.

How much does a new Tesla Model S battery cost?

That would put the cost of a new Tesla Model S battery alone at close to £8,870, before you factor in what it would theoretically cost to remove and replace the old one. It's an eye-watering sum, and one which would probably leave you wondering whether or not you should just buy a new car, or avoid electric cars entirely.

How much does an electric battery cost?

Alongside car make, a significant factor in electric battery costs is battery size. For example, a large battery with over 100 kWh can easily cost over £11,000. In contrast, a smaller battery with as little as 50 kWh will cost around £5,000. Expect to pay more for a Tesla battery replacement than a Fiat 500e or Nissan Leaf!

Why are electric car batteries so expensive?

Electric car battery replacements are usually necessary due to battery degradation, accidents, or faulty manufacturing. Factors affecting the cost include battery size, type, vehicle make and model, labour costs, and advancements in battery technology. Also, batteries for premium cars tend to be more expensive to replace.

Europe's largest battery storage project, the 100-megawatt system in Minety in Wiltshire, South West England, is now fully operational. Controlled and optimised by Shell-owned Limejump, the battery will help balance the UK's electricity demand, providing electricity for up to 10,000 homes for a day before being recharged.
