

New policy direction for energy storage projects

How will a new funding program help energy storage developers?

The UK government is launching a new funding program to unlock investment in long duration storage, a key part of its drive to optimize the expansion of renewable energy. Under the so-called cap and floor regime -- already used for electricity interconnectors -- energy storage developers will be guaranteed minimum revenues.

Why is the government removing market barriers to energy storage?

In its response to EAC's report, published today, the Government has set out the steps it is taking to remove market barriers so as to support the rollout of energy storage projects at scale, in order to keep the lights on when renewable energy generation is low.

What is the long duration energy storage Investment Support Scheme?

Long Duration Electricity Storage investment support scheme will boost investor confidence and unlock billions in funding for vital projects. The UK is a step closer to energy independence as the government launches a new scheme to help build energy storage infrastructure.

What is the 'cap and floor' regime for long duration electricity storage (LDEs)?

Ofgem is the regulator for Long Duration Electricity Storage and oversees implementation of a 'cap and floor' regime for LDES projects, proposed by the Department for Energy Security and Net Zero (DESNZ). The aim of this regime is to stimulate investment in Long Duration Electricity Storage projects.

Can long duration electricity storage help decarbonise our energy system?

We're consulting on the policy framework to enable investment in long duration electricity storage. Long duration electricity storage can provide an important contribution to decarbonising our energy system. For example, it can store renewable power and discharge it during periods of low wind.

How do I contact OFGEM about the long duration electricity storage cap?

If you're interested in the FAQ document from this webinar, please email LDES@ofgem.gov.uk. If you would like to speak to someone at Ofgem about our work on the Long Duration Electricity Storage cap and floor regime, please email LDES@ofgem.gov.uk.

require investments of over \$60 billion in new generation and storage technologies and in building out the electric grid to accommodate a nearly five-fold increase in peak demands that will result from beneficial electrification. I propose a new state structure - the Maine Energy Generation Authority - to accomplish this.

China is reshaping the global energy landscape, setting its sights on an ambitious transformation driven by renewable energy. In its latest move, on October 30, 2024, the Chinese government unveiled the Guiding ...

New policy direction for energy storage projects

7.5 Energy Storage for Data Centers UPS and Inverters 84 7.6 Energy Storage for DG Set Replacement 85 7.7 Energy Storage for Other > 1MW Applications 86 7.8 Consolidated Energy Storage Roadmap for India 86 8 Policy and Tariff Design Recommendations 87 8.1 Power Factor Correction 89 8.2 Energy Storage Roadmap for 40 GW RTPV Integration 92

The plan will provide clarity on what the energy mix will look like for 2030 on a national and regional level, including updating the National Policy Statements for energy that guide planners so ...

A key component of that is the development, deployment, and utilization of bi-directional electric energy storage. To that end, OE today announced several exciting developments including new funding opportunities for energy storage innovations and the upcoming dedication of a game-changing new energy storage research and testing facility.

Government will unlock investment opportunities in vital renewable energy storage technologies to strengthen energy independence, create jobs and help make Britain a clean energy superpower

2.5.2 Superconducting magnetic energy storage (SMES) 15 Section 3 Energy Storage Today 17 3.1 Energy storage policies internationally 17 3.2 UK energy storage projects 20 3.3 DNO Low Carbon Network Fund energy storage projects 23 Section 4 Industry Interviews 23 Section 5 Conclusions 26 References 27 Annexes 29 3

Promoters (in England) can still apply for the project to be consented under the Planning Act regime (by requesting the Secretary of State make a direction (a section 35 direction)) For electricity storage projects being developed in conjunction with an NSIP electricity generating station (in England) promoters have the option of including the ...

ECMC Statement on Integrated System Plan Policy Direction At its meeting of 1 March 2024, the Energy and Climate Change Ministerial Council (ECMC) agreed to ... required to support this new and additional analysis in the ISP and will work with AEMO to ensure ... Enhancing consideration of energy storage and renewable generation

This paper employs a multi-level perspective approach to examine the development of policy frameworks around energy storage technologies. The paper focuses on the emerging encounter between existing social, technological, regulatory, and institutional regimes in electricity systems in Canada, the United States, and the European Union, and the niche level ...

Figure 2: Cumulative installed capacity of new energy storage projects commissioned in China (as of the end of June 2023) In the first half of 2023, China's new energy ...
