What is a tin/lead termination surface mount capacitor?

KEMET's Commercial "L" Series with Tin/Lead Termination surface mount capacitors in C0G dielectric are designed to meet the needs of critical applications where tin/lead end metallization is required.

What is a silicon capacitor?

Silicon Capacitor technology also offers a very stable capacitor value over the full operating voltage & temperature range, with a high and stable insulation resistance. This Silicon based technology is RoHS compliant and compatible with lead free reflow soldering process. (\*\*\*) Other values on request. 935.121.

How do you put a capacitor in a solder pack?

Pick the capacitor from the tape & reel or the Gel Pack keeping backside visible using a vacuum nozzle and organic tip. Temporary place the capacitor on land pattern assuming the solder paste (Flux) will stick and maintain the capacitor.

Does C0G have a change in capacitance?

C0G exhibits no change in capacitance with respect to time and voltage and boasts a negligible change in capacitance with reference to ambient temperature. Capacitance change is limited to  $\pm 30\text{ppm}/^\circ\text{C}$  from  $+125^\circ\text{C}$ .
