

Can a PV system be installed on a house?

PV is very modular. You can install as small or as large a PV system as you need. Example: One can install a PV module on each classroom for lighting, put PV power at a gate to run the motorized gate-opener, put PV power on a light pole for street lighting, or put a PV system on a house or building and supply as much energy as wanted.

When can new PV modules be added?

New PV modules can be added at any time. Photovoltaic (photo = light; voltaic = produces voltage) or PV systems convert light directly into electricity using semi-conductor technology. (@10% efficiency) Thermal systems (hot water, pool heaters) produce heat from the sun's radiation (@+40 % efficiency) Large difference in value of energy types.

What is a PV panel?

Panel: A group of modules that is the basic building block of a PV array. Panel is a term used for a group of modules that can be packaged and pre-wired off-site. The size of the panel (or large modules) is often related to how much weight and size two workers can effectively handle on a roof surface, such as you see here.

How do I care for my solar panels?

For your safety, we recommend that you do not attempt any servicing yourself. The solar panels work best when clean. Regular rainfall or washing with a hose will maintain their cleanliness. If they do become excessively soiled they can be cleaned with cold water.

How do you ground mount a PV system?

Two common methods of ground mounting PV systems are racks and poles. Some pole mounts may also have the ability to track the sun across the sky. Another method of ground-mounting is a patio cover. This provides shade to the patio area without taking up valuable yard space. It also provides an alternative to roof mounting.

How does a PV system work?

The power produced by the PV system is now consumed by the electric loads in the building. Only the electricity not first consumed by the building will be exported to the grid. During daylight hours, your system will be generating electricity at varying rates depending on the amount of sunshine.
