

What is the global demand for rechargeable batteries?

Nevertheless, even though electric mobility increasingly dominates the market for rechargeable batteries, global demand capacity for batteries in consumer electronics is expected to increase by 60% in 2030 (from 43 GWh in 2020 to 69 GWh in 2030) (see Figure 5).<sup>21</sup> Following (e-bikes and e-scooters) is projected to increase by about 15% by 2030.

What is the market share of smartphones with nonremovable batteries?

The market share of smartphones with nonremovable batteries reached 90% coverage in 2017. By 2019, there were no bestselling smartphones that did not use adhesive to join and fasten batteries and housing. 1. Market Overview

Why is battery removability important?

The market for rechargeable LIBs in consumer electronics is projected to more than double while the global demand for LIBs is projected to grow by 15% by 2030. Therefore, ensuring battery removability and replaceability is imperative to safeguard the environment, economy, and society from the devastating impacts of producing and discarding batteries.

What is the rechargeable Lib market?

Laptops and tablets represent over half of the rechargeable LIB market for consumer electronics, closely followed by smartphones. The majority of rechargeable LIBs that have reached EOL come from consumer electronics, followed by LEVs. This trend is projected to continue into the next decade.

Which rechargeable batteries are most popular in Germany?

In their study, the Fraunhofer-Institut found that LIBs were the most popular rechargeable batteries for consumer electronics, accounting for 62% of all rechargeable portable batteries in the market (see Figure 3).<sup>3</sup> FIGURE 3 Portable batteries market in Germany in 2015. Adapted from Stahl et al 2018.

What is the global demand for Lib batteries?

Global demand capacity for LIB batteries is projected to increase by 60% in consumer electronics and by 15% in LEVs by 2030 (see Figure 1). Laptops and tablets represent over half of the rechargeable LIB market for consumer electronics, closely followed by smartphones.

Battery 2030+ is the "European large-scale research initiative for future battery technologies" with an approach focusing on the most critical steps that can enable the acceleration of the ...

R10/R12/R12i Rechargeable Battery quantity. Add to basket. other products. Add to basket; BPack, Li-Ion, 7.2V, 2200mAh. Add to basket; Antenna 2.4Ghz - Short - without cap. ... Survey Solutions Scotland, Registered Business, Trading as ...
