Which solar charger is best?

The BigBlue SolarPowa 100 ETFE was the best value, providing great charging speed, light portability, and a low price tag. If you need to charge a phone or camera, see our portable solar charger review, which compares smaller and more packable panels.

How many solar chargers are there?

I called in 13 different solar chargers from nine different manufacturers for testing. The main criteria was that it be a portable panel that you can use to charge a small electronic device, like a smartphone or a tablet, without the need for a power bank as an intermediary.

What makes a good portable solar charger?

Great portable solar chargers prioritize size, weight, and packability over all else. These smaller models are designed to charge electronic devices with lower energy needs, like cell phones and smartwatches. But if you're trying to charge something that takes a lot of power, they won't work as well.

What are the different types of solar charge controllers?

There are three types of solar charge controllers: simple shunt controllers, PWM controllers, and MPPT controllers. The first type, shunt controllers, are outdated and are not used anymore. They work by simply switching a shunt on or off to allow or block current to the battery. They are ideal if you don't want any electromagnetic interference.

How are solar charge controllers rated?

Maximum charge current: Solar charge controllers are rated by their maximum charging current, which is measured in amps. The controller's charge current rating must be below the maximum charging current of the battery being used in the system.

Where can I buy a solar charge controller?

Solar charge controllers are available at most hardware stores that offer electronic products, like Home Depot, AutoZone, or Fry's Electronics. Solar charge controllers are also available online, at a general e-commerce site like Amazon, or through a solar equipment supplier like Wholesale Solar, Solar Electric Supply, or Renogy.

A solar inverter, or solar panel inverter, is a pivotal device in any solar power system. Solar inverters efficiently convert the direct current (DC) produced by solar panels into ...
