Easy Access: As solar power has become a popular energy option for homes, you can purchase a home solar kit online at a wholesaler, like Solar Electric Supply, or at your local hardware store, like Home Depot. If you choose to ...

Part of what I built was a solar generator using solar panels, a solar charger, a 230 AH battery and this 3000W inverter. All this is pretty much to power two dorm fridges that say they use 206 KWH per year (only .6 per day) so that's 412 KWH or 1.2 per day for the both of them. I've already tested the solar panles, charger, and battery.

A simple system doesn't involve any re-wiring, and doesn't change any of the wiring to the rest of the house. The solar panels connect into your consumer unit as a new dedicated circuit.

We are approved and certified by over 5 independent bodies and we pride ourselves in being accredited to ensure we supply trusted solar panels and professional installation.
