

Rooftop industrial and commercial solar panels

What are commercial rooftop solar panels?

Commercial rooftop solar panels are not all created from the same material and therefore have different efficiency ratings. Monocrystalline solar panels are made from one silicon piece and are known for being the most efficient solar panel type on the market. As such, they are also the most expensive.

Can a solar PV system be installed on a factory roof?

As factories are energy-intensive buildings, installing a solar PV system on the roof of a factory ensures free power can be generated to run everything underneath it. While reducing energy costs, a solar PV installation has the added benefit of demonstrating Corporate Social Responsibility thanks to its environmental credentials.

What are the benefits of solar PV on warehouse roofs?

As energy efficiency rises to the top of the agenda for warehouse and logistics firms, more and more are seeing the benefits of solar PV. Installing solar PV on warehouse roofs means generating free electricity for the warehouse and adjacent buildings, such as offices.

What are the benefits of commercial solar panels?

Reduced costs, energy efficiency, and energy independence are among the main benefits of solar panels for businesses. On average, commercial solar panels can break even in 4 or 5 years due to their high solar absorption capacities. The best solar panel companies for larger arrays include LG, Sharp, SunPower, Panasonic, and Yingli Solar.

Are commercial solar panels a good investment?

Commercial solar panel installation can bring many benefits: Over the 25-year lifetime of solar panels, savings can equate to thousands of pounds. A 20kW system can potentially save businesses over £3,000 annually on their electricity bills. Solar panels allow for energy independence and some level of insulation from fluctuating electricity prices.

Which companies have a solar PV system?

Flooring installation specialists, F. Ball & Co are loving their 300kW solar panels. Conveyor maintenance solutions company, Conveyor Systems Ltd, have added a solar PV system to their already sustainable company. Manufacturers, Tappex Threads Inserts, are ready to start saving money on their electricity bills with their 94kW solar PV system.
